

BMW Driver Training

BMW Driver Training can provide you and your family with driving skills that will last a lifetime and possibly save a life. BMW is the world leader in driver training and, with 30 years of experience, understands that the process of improving road skills to become a better driver is made far more effective if the experience is enjoyable. Our courses cover everything from essential driving skills to advanced competency levels – whether avoiding an obstacle on a wet road, gaining valuable experience away from the freeway or perfecting the ideal line on a racing circuit.

On completion of each course, every driver will have the vehicle – and themselves – under better control than ever before. BMW Driver Training is much more than mastering unexpected situations and honing technical and mental skills, it's about the exhilaration of a truly memorable experience. Importantly, you don't have to own a BMW to participate. Anyone with a driver's licence can discover the unmatched pleasure of driving one of our vehicles, whilst at the same time learning valuable skills and driving

techniques that will apply to your everyday driving.

Depending on your existing level of driving skill, education and ability, BMW Driver Training has designed two entry level courses for you to choose from.

BMW Driver Training - Level I - Advanced I

For established drivers, the Advanced I training course is the ideal starting point towards a safer, more confident and enjoyable way of driving. This one-day course in our dedicated fleet of E90 BMW 325i sedans covers key driving techniques and elements including braking and emergency avoidance manoeuvres. It also looks in-depth at typical driving scenarios encountered and how to respond to them effectively.

BMW Advanced Training I is available for you to purchase at the reduced price of \$560 (GST inclusive)*. This course is normally priced at \$660.00 (GST inclusive). Advanced Training I will take place on Monday 2 July.

BMW Driver Training - Level 2 - Advanced II

Advanced Training II is an exciting entry-level course designed to provide a solid foundation for performance driving. This one-day course in both BMW 325i sedans and high-performance BMW M3 coupés, simulates a number of different situations that may be encountered at touring speeds.

On-circuit activities include (but are not limited to):

Laps in both 325i and M3.

Ideal cornering lines.

Advanced braking techniques.

Timed competitions (Slalom).

Oversteer and Understeer.

The day concludes with exhilarating hot laps in a BMW M3 (driven by Instructors).

BMW Advanced Training II is available for you to purchase at the reduced price of \$930 (GST Inclusive)*. This course is normally priced at \$1095.00. Advanced Training II will take place on Sunday 1 July.
